

Experience

Senior Product Designer Cloudflare November 2024 - May 2026

- Implemented AI enhanced design workflows with new design tools and created in-product prototypes.
- Led design across Application Security with a focus on our API security suite of products.
- Unified 5+ unique experiences into an overview with config recommendations, creating up to a 75% conversion rate.
- Improved 10+ person team alignment and velocity with a sprint process running for over 2 years.
- Part of 2 AI tiger teams to implement new design systems in code and identify opportunities for AI workflows.

Product Designer Cloudflare April 2020-November 2024

- Primary designer on 10+ product launches across 5 product areas.
- Proficient in a range of cloud technology such as serverless computing, edge security, and app performance.
- Mentor to new hire designers.
- Designed and assisted development of the launch of Cloudflare media platform [cloudflare.tv](#).

UX Design Lead IBM Design April 2019-April 2020

- Lead designer on 2 person design team for IBM Cloud Databases.
- Oversaw and created the user experience for 13 services across 3 project teams.
- Conducted bi-weekly sprint planning and retrospective with design and project management.

UX Designer IBM Design Sept 2015-April 2019

- Lead designer on multi-million dollar products for IBM Cloud Infrastructure.
- Owned design for complex services like Security Groups, Cloud Internet Services, and IBM Virtual Private cloud.
- Created detailed design flows with Invision and Sketch for user testing and development.
- Planned and facilitated design thinking sessions with cross functional stakeholders.
- Represented IBM at Think conference and as a speaker at Big Design Conference.
